WASTE ISN'T USELESS

AL-KO shredders are much more than machines that cut garden waste. They are specially designed to shred and cut waste in a way that increases the surface area, which accelerates the decomposition process for composting. Shredded material can be used as mulch for various applications such as shrubberies, rockeries and nutrients when composting.

AL-KO
QUALITY FOR LIFE

PERFECT CHIPPINGS

All AL-KO shredders provide perfect chippings for use in the garden, either for compost or for use around shrubberies and rockeries. The Dynamic Micro is specially designed to produce superfine chippings.
