

This 2400 E is powered by a 2400W motor that provides a blowing speed of 205km/h, and suction capacity of 9.7m³/min. The large 40L capacity with innovative pre-separator collects pine cones and stones in a separate box, shredding leaves and reducing green waste by up to 90%, depositing the mulch into the zipped collector bag. With a shoulder strap and guide wheel, the Hurricane can be easily wheeled along hard surfaces, reducing operator fatigue.

INNOVATIVE PRE-SEPARATOR

The innovative pre separator collects heavy debris such as pine cones before they reach the shredder fan, reducing the risk of blockage

EASY SWITCH BETWEEN FUNCTIONS

The 2200E is easily switched between blowing and vacuuming via a simple lever, simply push forward or pull back to select a mode.

SPECIFICATION – 2400 E

Motor	2400 W
Blow speed	170 - 210 km/h
Suction capacity	5.0 - 10.0 m ³ /min
Reduce rate	Upto 90%
Collector capacity	40 ltr
Pre-separator	5 ltr
Potentiometer	Yes
Shoulder strap	Yes, with pad
Weight	6.7 kgs

SOLE DISTRIBUTORS IN INDIA:
