

The AL-KO Dynamic Micro Shredder with its ingenious fine shredding system is ideal for medium-large sized gardens. With safe and easy branch feed, the kidney-shaped branch feeder easily accommodates larger, more awkward branches. To prevent clogging, two large clearing paddles push materials through, easily and efficiently. For user safety, a rubber security device prevents shredded material from being ejected backwards. For shredding green garden waste or for a coarser cut, simply remove the two screws and release the blade set.

## SHREDDER

Model: Dynamic MICRO

### MULTI-BLADE CUTTING SYSTEM

The Dynamic Micro model has 5 additional blades which shred and chip branches and twigs up to 40mm into ultra-fine shredded material for fast composting.

### PERFECT CHIPPINGS

All AL-KO shredders provide perfect chippings for use in the garden, either for compost or for use around shrubberies and rockeries. The Dynamic Micro is specially designed to produce superfine chippings.

### WASTE ISN'T USELESS

AL-KO shredders are much more than machines that cut garden waste. They are specially designed to shred and cut waste in a way that increases the surface area, which accelerates the decomposition process for composting. Shredded material can be used as mulch for various applications such as shrubberies, rockeries and nutrients when composting.

SPECIFICATION	Dynamic MICRO
Power	2500 W
Voltage	230 V
Zero voltage switch	Yes
Fuse (slow)	10 Ampere B
Branch Max	40 mm
Height	110 cm
Weight ( approx.)	34 Kgs
