

The SPF 3000 pump in discrete black can be harmoniously inserted in the total look by placing pebbles and rocks in the special recess in the upper pump housing. This added weight also ensures optimal pump stability.

**TRIPLE FILTRATION SYSTEM**

The SPF 3000 pump creates optimal water quality for aquatic plants and pond inhabitants in still water, thanks to the large-surface **triple filter system** with two mechanical components and one active charcoal component.

**ELEGANTLY ALIGNED**

The pivoting and height- adjustable standpipe ensures optimal alignment of the water features, even if the pond floor is slanted or uneven.

**SPECIFICATION – SPF 3000**

Motor/Power	54 W
Max. Head	2.6 Mtr.
Max. Fountain Height	110 cm
Max Flow	2650 ltr/h
Cable Length	10 m
