

The AL-KO Scythe Mower is a powerful specialist machine offering excellent cutting performance. The specially hardened ESM blades come as standard and result in the toughest jobs being handled with ease. The user friendly handles can be adjusted to suit the height of the operator. This easy to use, high performance, lightweight scythe mower is powered by a reliable Briggs & Stratton Series Engine and is ideal for cutting and harvesting long grass.

ESM CUTTING HEAD FOR HARD USE

Specially hardened, double cutting blades with hinged guide to ensure a longer life. In addition, the height of the blade is easily adjusted.

SAFETY PACKAGE

The edge protection prevents the scythe blades from knocking against walls, fences and border stones while in use.
