

WIDE VARIETY OF USES

The pump is designed for use in various applications like

- Draining flooded excavation pits
- Pumping water from wells
- Emptying containers or pumping liquid from one container to another
- Aerating garden ponds or artificial streams
- Emptying the cellar or your house after a flood

ENORMOUS POWER

The BVP 19000's strong motor allows it to handle extremely dirty water and pump out water containing suspended particles up to 38 mm in size. The special vortex impellers can be used in highly contaminated water with upto 5% suspended solids.

SPECIFICATION – BVP 19000

Motor / Power	1000 W
Max. Head	11 mtrs
Max. Flow	19000 ltr/hr
Max. Submersible depth	7 m
Max. particular size	38 mm
Pump Outlet	1.5 in
Weight	8 kgs.
